

FEELING THE BURN?

Getting painful sunburn just once every two years can triple the risk of the most deadly form of skin cancer, malignant melanoma.

Skin cancer is the most common type of cancer in the world. It's also the easiest to avoid – 90 per cent of all skin cancer deaths could be prevented if sun exposure is controlled.

If you're at risk:

- follow the rules about protecting yourself from sun exposure – ask your boss if you're not sure about anything
- check your skin regularly for the tell-tale signs of cancer – look at IOSH's **Check it out** card for more info

WORKING TOGETHER TO BEAT OCCUPATIONAL CANCER

The Institution of Occupational Safety and Health is campaigning to stop thousands of untimely deaths to work-caused cancer – find out more at

CLOUD CUCKOO LAND?

Up to 80 per cent of dangerous sun rays get through a cloudy sky

Thinking that you can't get damaged by the sun on a cloudy day is a myth. Protect your skin, even when it's cloudy, or you could get skin cancer.

Skin cancer is the most common type of cancer in the world – it's also the easiest to avoid. If you're at risk:

- follow the rules about protecting yourself from sun exposure – ask your boss if you're not sure about anything
